

Figure 12: Sample chromatogram of sample plasma

## **Dilution Integrity**

The ability to dilute samples originally above the upper limit of the standard curve is demonstrated by accuracy and precision parameters.

## **Stability**

The analytical results for the stored plasma samples containing rhein concentration of {(QC Low: 150, QC Mid: 4000, and QC High: 6000) ng/ml} were compared with those for the freshly prepared samples:
