## 2.8 Chromatographic Conditions:

 Table 10: Summery Table of Chromatographic Conditions
 Conditions
 And Mass

 Spectrometric Conditions
 Spectrometric Conditions

HPLC Conditions	Pump Flow Rate			Autosampler Inject Volume			ection	tion Autosampler Temp				Column Oven Temp	
Conditions	1.0 ml/min			5 μl				4°C			30°C		
Chromatography	Mobile phase Gradient Elution			Step	Step Total Time(mi		Rate	Flow Rate (µl/min)		A (%) Methanol		B (%) 0.2% F.A	
				0			1000			50.0		50.0	
				1	0.01		1000		50.0			50.0	
				2	0.02		1000		100.0			0.0	
				3	0.70	1000			100.0			0.0	
				4			1000		50.0			50.0	
				5			1000		50.0			50.0	
	Column type			ACE 5 C18 Column (50 X 2.1 mm), 5μ									
	Expected Retention times(minutes)			Candesartan			Irl	Irbesartan (I.S)					
				1.4			1.	1.0					
MRM Detection Conditions	Analytes	Q1 Mas	- 1 ( ) 4		Q3 Mass		Dwell		P	DP	EP	СЕ	CXP
	Candesartan	441.20 0		263.200		150		70		81	10	19	22
	Irbesartan (IS)	429.45 3		207.300	0	150		70		26	10	8	22
MS Conditions	CUR		CA	D	IS	IS		TEM			NEB		
	10 6		6	550		O		400				5	

## 2.9 Irbiartan as internal standard

Irbesartan as internal standard is used to determine the concentration of candesartan by calculating response factor. irbesartan is similar to candesartan and have a similar retention time. It is stable and does not interfere with the sample components.
