Course Objectives

أهداف وغايات المقرر

"Accounting Studies In English" is a Course that covers the fundamentals of accounting. Accounting is more than just memorizing terms and procedures; it's a whole new way of thinking about finances. This course assumes students have no prior knowledge about accounting in English language, and delivers lessons and examples to build accounting skills in English language. It also covers the fundamentals of cost and managerial.

After completing this course, The student will have a solid understanding of accounting in today's world. By applying the concepts learned in this course, The student will understand the processes behind Accounting Cycle, enable to discuss and explain the different steps of preparing financial statements using English concepts and terms.

Learning this course will help our students achieve a skill that is an invaluable (if not required) asset to their professional development.

مخرجات التعليم (المعارف والمهارات) Learning Outcomes (knowledge and skills) بعد الانتهاء من دراسة هذا المقرر يتوقع أن يكون الطالب قادرا على:

- 1- Understand the theoretical framework of accounting: accounting principles and assumptions.
- 2- Analyze, record, classify the accounting transactions using the journal, the ledger and the trial balance.
- 3- Complete the accounting cycle by preparing the adjustment entries and the financial statements (income statement and balance sheet).
- 4- Prepare the transactions related to the accounting for merchandising operations (e.g. sales, purchases, and discount).
- 5- Analyze the accounts and notes receivables and the allowances.
- 6- Compute the inventory costing methods (FIFO, LIFO and WA) and the valuation of inventory.
- 7- Understand the nature of plant assets and the accounting for depreciation.
- 8- Understand the behavior of costs and job order costing accounting.

9- Understand managerial accounting basics and cost-volume-profit relationships.
