The structure of the Arabic noun phrase has never been systematically considered. Most Arabic textbooks of traditional grammar (cf. El-Jarem, 1980) deal with notional definition of "Nominal" sentences in relation to "Verbal" sentences. There is no reference to any of the modifiers that accompany noun in the noun phrase before and after. Nor is there any attempt to describe the formal features of the noun phrases as a constituent of the sentence-type referred to as "Nominal".
